

DETAILED MONTHLY REPORT

For the month of the April

Date	Activities / Tasks	Learnings
Apr 1	Continued preparation and refinement of the Xplore Nexus SaaS proposal and frontend concepts for presentation.	Learned proposal refinement and project planning techniques.
Apr 6	Conducted frontend revisions and improved UI sections based on project requirements and supervisor feedback.	Improved frontend enhancement and revision implementation skills.
Apr 7	Continued development preparation for Xplore Nexus and organized technical planning notes and workflows.	Learned project organization and system planning techniques.
Apr 8	Improved frontend component organization and optimized reusable layouts for future development tasks.	Learned reusable frontend architecture practices.
Apr 10	Continued frontend development and optimized layouts and section responsiveness for desktop and mobile devices.	Learned responsive optimization and UI consistency techniques.
Apr 13	Started technical documentation drafting and system planning for the Xplore Nexus platform.	Learned proper technical documentation and workflow preparation practices.
Apr 14	Continued frontend improvements and reviewed architecture planning for scalable platform development.	Improved understanding of scalable frontend structure and project organization.
Apr 15	Implemented RBAC functionality including Admin, Organizer, Instructor, and Participant roles. Added persistent event creation and localStorage integration.	Learned role-based access control implementation and frontend persistence handling.
Apr 16	Continued development of Xplore Nexus modules and optimized frontend system structure.	Learned modular frontend development and system organization.
Apr 17	Initialized the TNA Portal project using Next.js and prepared the project structure and development environment. Also encoded reimbursement receipts requested by the supervisor.	Learned project scaffolding, environment setup, and administrative documentation handling.
Apr 20	Developed REST API endpoints for training and user management modules supporting CRUD operations.	Learned backend API routing and RESTful development concepts.
Apr 21	Configured environment variables and API integrations including Zoom API and external services configuration.	Learned environment setup and third-party integration configuration techniques.
Apr 22	Continued frontend development for the TNA Portal and improved survey flow and UI readability.	Learned usability enhancement and frontend structuring practices.
Apr 23	Rebuilt the TNA Portal survey flow based on the Informatics Excel TNA structure. Added privacy consent, participant information, and survey sections.	Learned multi-step survey logic and privacy compliance implementation.
Apr 24	Fixed build issues and deployment-related problems in preparation for production deployment.	Improved deployment troubleshooting and debugging practices.
Apr 27	Worked on recommendation workflow improvements and drafted project update documentation and communication materials.	Learned reporting and workflow enhancement practices.
Apr 28	Continued frontend enhancements and improved survey step transitions and responsiveness.	Learned frontend workflow optimization and UI refinement techniques.
Apr 29	Integrated Gemini AI recommendation functionality and improved dashboard readability and frontend accessibility.	Learned AI integration and frontend usability optimization.
Apr 30	Participated in discussions regarding respondent segmentation, analytics structure, and reporting workflows for the TNA Portal dashboard.	Learned respondent classification, segmentation, and analytics planning concepts.

Total Hours Completed: 149 hours
